

C183 - Formative Assessment 1

Hand Drawn Map

Assessment Due Date:

- ☐ September 9th, 11:59 PM
 - ☐ Upload a combined PDF to the bCourses page for this assessment. The PDF will include:
 - ☐ The **hand drawn map**
 - ☐ The assignment sheet with the **boxes checked**
 - ☐ A **3-5 sentence handwritten analysis** of your map explaining your choices.
- Suggested to use notebook paper instead of the back of the map.

Assessment Criteria:

- ☐ Map prompts (choose one, more details below):
 - ☐ Map of the East Bay, as you experience it
 - ☐ Map of a personally meaningful place
 - ☐ Map of the campus, from the perspective of a squirrel
- ☐ Cartographic requirements:
 - ☐ A map title
 - ☐ Your name and student ID number in top or bottom corner
 - ☐ At least one line (i.e. a sinuous stroke style representing a river)
 - ☐ At least one symbol representing a real landscape element
 - ☐ Write a short reflection (3–5 sentences) explaining your choices.
- ☐ Materials:
 - ☐ Pencil and black ink pen ONLY
 - ☐ White paper, as provided
- ☐ Developing visual thinking skills:
 - ☐ **Distance** - how do you choose where to put relative places on the page?
 - ☐ **Scale** - what elements do you make bigger and smaller?
 - ☐ **Stroke** - how can you use stroke tone/weight to communicate meaning?
 - ☐ **Texture** - what kinds of fill patterns can you use to show the area?
 - ☐ **Symbolism** - what symbols, icons and pictographs do you choose?

Assessment Context:

In this assessment, you will be undertaking a critical part of the Cartographic workflow: *sketching it out*. Though your later lab assignments will be done via computing and/or digital graphics, this is an opportunity to get familiar with a ‘soft skill’ not listed in a job description’s required knowledge base. Hand drawing a map will help you think about your experience in a landscape, and how to communicate this visually to someone via pen, pencil and paper. Sitting in front of a blank piece of paper in reflection of a landscape is the unwritten ‘first step’ to constructing a compelling map. Formulating an idea about what matters about the landscape gets you thinking through cartographic decisions: style, format, tone, colors, data selection, data representation and overall narrative structure.

The optional reading associated with this assessment, “The Beauty of Chalk”, discusses the disappearing art of bodily motion and hand drafting in the production of mathematical knowledge. Having worked for 3 years in Cartography/Mapping proper, I can say there is disappearing art of mapping professionals sitting around a piece of mylar using drafting tools to make design decisions. Most 9-5 geospatial jobs consist of a team stationed in front of desktops poking at coding scripts and databases. However, it was not too long ago that all professional trades were built on the element of visual thinking, and required you to be a draftsman and artist (see my SFDPW curated exhibit *Drawing the City* to see how civil engineers visualized infrastructure in the 30s-40s).

My call to action: we are stuck in an era of boring, and increasingly ineffective maps. What will set you apart in your professional and intellectual career is the ability to communicate your thoughts in inventive, highly effective and original ways - whether you are a geologist, engineer, social scientist or cabinet installer.

Assessment Prompts:

Choose ONE Option

1. ATTN: RE: EBMOL Cartography Request for Proposal (RFP)

- a. On behalf of the East Bay Ministry of Lands (EBMOL), Department of Civic Romanticism (DOCR), Bureau of Territory (BOT), and Cartographic Division (CART), we are issuing a Request for Proposals (RFP) for a new map of the East Bay. In a recent ministerial meeting, it was revealed that BOT's Chief Cartographer has misplaced the official map of our territory. This misstep has led to widespread confusion, public outrage, and riots — after all, how can the sovereign govern a land that cannot be clearly referenced in a sublime image? To resolve this image crisis, we are turning to our citizens. We ask you to draw your own map of the East Bay:
 - i. Show what the East Bay means to you.
 - ii. Include the features, landmarks, or experiences that help you recognize and orient yourself in this place.
 - iii. Your map will contribute to DOCR-BOT-CART's project of re-imagining and re-configuring the East Bay's cartographic remedy.
- b. *In short*: Draw your idea of the East Bay — what it looks like to you, and the landmarks that make it feel like the East Bay

2. A Personal Place

- a. Pick a place that holds a strong place in your memory. Think about why this place sparks fondness, yearning, nostalgia (any emotion, really).
- b. Spend 5–10 minutes reflecting on what you may want to include in your map.

- c. Sketch your map by hand. Try to show important features, landmarks, or memories.
- d. As you draw, you might think about style choices (color, shading, symbols, etc.).

3. Partial perspective of the UC Berkeley Campus

- a. You are a squirrel living in the area outside McCone Hall near Observatory Hill. Your friend, another squirrel, seeks to discover the bounty of acorns on the other side of campus near Sproul Plaza. Draw a map to show them how to get there - in squirrel terms.
