Choosing Objects of Study

If you haven't got a map already, go to the UC Berkeley Library website and find a map based on what you learned last week..

1. Choose a Map

Title:

Year:

Cartographer:

2. Describe

Describe your map: what elements are on it?

3. Examine

Examine one element: what does it reference?

What is it like?

(Hint: try Google reverse image search if you're stuck)

4. Interpret

Find either a critical cartographic or history of cartography research article about this element or similar. What does it say?

5. Critique

What work does this element do? What kind of idea is it communicating? Does it reify or undermine the authority of cartography?

In Groups of 3-4

Show your group your map, and answer the following questions.

6. Compare

What elements
would they
choose?
Why?

7. Contrast

Present to them your arguments in 5. *Critique* - do they agree? Ask them to come up with a contrasting position (even if it sounds ridiculous). Do you agree? Why/why not?

8. Differences

As you go around your group, reflect on the other maps that have been chosen. Does their interpretation make you look at your map in a new light? For each map, jot down at least point of reflection.
